

CAREVO PRESS RELEASE

Introducing the new CAREVO shower trolley by ArjoHuntleigh

The new standard in dignified hygiene care

Over the last 50 years, ArjoHuntleigh has been improving the lives of residents, patients, and caregivers in healthcare environments around the world. Our products have continually raised the standard of care, reduced the number of injuries in care environments, and made essential hygiene tasks fast and efficient. We are a world leader in integrated hygiene solutions for immobile patients.

Now, ArjoHuntleigh is proud to introduce a new product that will set a new standard in dignified hygiene care: the new CAREVO shower trolley.

Every feature of CAREVO has been designed to provide a comfortable and dignified alternative to bed bathing and assisted showering for immobile patients. The unique design makes hygiene tasks safe and efficient for caregivers and reduces the risk of needless injury.

The results of clinical research and testing speak for themselves. Showering immobile patients with CAREVO helps reduce dangerous static load for caregivers by 13% and improves time spent in a safe posture by 10%*.

The new CAREVO shower trolley sets a new standard of dignified care.
