

WELCOME TO A SAFER WORKING ENVIRONMENT

ARJO has been a leading provider of ergonomic solutions in healthcare for over 40 years. Our solutions are based on providing the right combination of equipment and training to ensure ergonomic working environments.

ARJO takes an active role in creating safer working environments within healthcare. We offer not only equipment that is at the forefront of high quality care, but also the background knowledge that ensures routines can be performed safely.

Over the past 40 years, we have built up a unique knowledge bank on ergonomics by listening to healthcare professionals.

Our experience and expertise is built into the design of the ergonomic patient handling equipment and hygiene systems that are used every day in the healthcare sector around the world.

ARJO makes its knowledge on ergonomics available to care facilities and passes on sound ergonomic principles through injury prevention programmes. These training programmes have shown outstanding results in minimising work-related strain and injury.

The unique dual approach of providing ergonomic systems and training makes ARJO the ideal partner for creating safer working environments in healthcare.
