

EcoDri-Safe™ Absorbent Rolls

Easily contain fluids and streamline OR cleanup procedures with Flagship Surgical's EcoDri-Safe Absorbent Rolls. These economical, disposable floor pads are ideal for use wherever fluids build up, including in the OR, around scrub sinks and on lab station floors. Our super absorbent, disposable floor pads eliminate expensive laundry costs and reduce OR turnover times.

The super absorbent pad material is manufactured with up to 33% recycled materials. An impermeable, non-slip poly backing (optional) promotes safety by locking liquid within the

absorbent material, and also helps keep the pad firmly in place.

EcoDri-Safe Rolls are available in 100 foot rolls, both with and without the impermeable, non-slip poly backing, and are perforated every 20 inches for easy tear-off.

EcoDri-Safe Rolls help prevent slips and falls, and minimize the transmission of harmful contaminants to healthcare providers. OR cleanup times are significantly reduced, and with efficient disposal these pads help prevent cross-contamination.

EcoDri-Safe™ Absorbent Rolls are ideal for a wide array of specialties, including:

- Orthopaedic Sports Medicine Surgery
- Cardiothoracic Surgery
- Trauma Surgery
- Transplant Surgery
- General Surgery
- Urologic Procedures
- Plastic Surgery
- Laparoscopic Surgery
- Cystoscopy
- Labor & Delivery/ C-Sections

Dri-Safe® Absorbent Pads

Easily contain fluids and streamline cleanup procedures with Flagship Surgical's Dri-Safe® Absorbent Pads. These economical, disposable floor pads are ideal for use wherever fluids build up, including OR floors, in front of scrub sinks, and on lab station floors. Our super absorbent, disposable floor pads eliminate expensive laundry costs and reduce OR turnover times.

Dri-Safe Pads help prevent slips and falls, and minimize the transmission of harmful contaminants to healthcare providers. OR clean-up times are significantly reduced, and with easy disposal these pads help prevent cross-contamination.

The super absorbent pad material is manufactured with 60% recycled materials. An impermeable, non-slip poly backing (optional) promotes safety by locking liquid within the absorbent material, and also helps keep the pad firmly in place.

Dri-Safe Pads are available in multiple size options, both with and without the impermeable, non-slip poly backing.
